

Oil Reservoir Sight Bottles

Oil reservoir assemblies easily screw in where the oil fill cap is located on all Hydra-Cell pump models D/G-03 and larger. Pumps equipped with an oil reservoir provides more volume for oil expansion and allows for quick visual monitoring of the oil level and its condition.

Three different reservoir bottles are available. The low-level float switch in the 16-oz bottle outputs a low voltage signal in the event the oil level in the pump housing drops.

Oil Reservoir Sight Bottles	Part Number
16 oz (474 ml) volume sight bottle	A01-116-3400
16 oz (474 ml) volume sight bottle with low-level float switch	A01-116-3410
4 oz (119 ml) volume sight bottle	A01-116-3500
